### **RE: New Jamison Plant Announcement**

To all Bingham & Taylor Customers,

Despite the challenges of the times we are facing, B&T has some exciting news to share. As our plastic blow-molding and CIP products have continued to grow we recognized the need to expand our operations to support our growth.

B&T is proud to announce the April 1<sup>st</sup> opening of our new Jamison Plastics Plant located in Fredericksburg, VA. This facility more than triples the production space of our current location in Culpeper.

Our Jamison plant is state of the art and will greatly improve the production efficiency and quality of our blow-molded plastic products. The facility will feature JIT deliveries, constant process monitoring and advanced production processes and capabilities. It will allow us greater flexibility in supporting customer orders and enhancing the speed of our deliveries.

Please note that beginning April 1<sup>st</sup>, all blow-molded plastic products, with the exception of our corrugated products, will be shipped from the following address:

**B&T Jamison**  
**8531 Jamison Lane**  
**Fredericksburg, VA 22407**

Our cast iron products will continue to be manufactured at our plant in Culpeper, VA. Injection-molded products and tools will also continue to be shipped from our other Fredericksburg location.

B&T looks forward to supporting your business from our new Jamison location. We are excited to open this new chapter in B&T's 171-year history.

Best Regards,

Steve Petrides  
EVP/GM
