Built for Heavy Traffic

Tri-Skirt Lids

Built on Quality - Focused on Innovation

bandt-us.com/

TRAFFIC SOLUTION

Made from cast iron, the Tri-Skirt Lid weighs in at a hefty 22 lbs, perfect for any area with traffic over 45 mph. The lid will only come out when lifted straight up vertically.

TAKE PRIDE IN YOUR CITY

All of our valve box lids can be completely customized to feature your logo and municipality name.

EASY ACCESS

Using a B&T Lid Lifter, you can easily install and access your valve box underground.

CRUNCHING NUMBERS

The Tri-Skirt Lid has a 4" skirt as compared to 1 1/2" for a regular valve box lid. This longer skirt tapers so that it will fit any 5 1/4" valve box regardless of the manufacturer. Another heavy duty choice is our lid with a 4" long straight skirt.

PEACE OF MIND

A lid that pops out can damage vehicles, become a road hazard and cause your municipality liability issues. Tri-Skirt Lids reduce this risk resulting in less unnecessary maintenance.

Powder Coating is available to reduce routine maintenance.
