Built on Quality - Focused on Innovation

Keep Your Valve Box Clean and Stable

Valve Box Stabilizers

bandt-us.com

PREVENT SOIL INTRUSION

Cut down on extensive and time-consuming excavation to access your operating nuts by using a valve box stabilizer. B&T's Stabilizers are highly effective in preventing the intrusion of dirt, backfill, or sand from below.

A PROPER FIT

Stabilizers fit round cast iron or plastic valve boxes and ensure proper alignment of the valve box while reducing the risk of shifting or settling valve boxes.

KEEP WEIGHT OFF VALVE

B&T's stabilizers ensure that the "down" force is transferred to the back filled area, rather than to the buried valve or pipe. It is also effective in keeping the valve box off the valve bonnet.

COMPONENT SPECIFICATIONS

ADAPTER TYPE	DIAMETER	CENTER HOLE DIAMETER	FITS
Multi-Fit	6.75-10.25	1.0-3.25	5 1/4" VB Bottom Sections, 8" PVC & C-900/C-905
#6 Base	18.0-18.9	2.0-3.25	#6 Base
VBA II	7.75	n/a	5 1/4" VB Bottom Sections
Meter Pit	17.5-23.5	3.25	18", 20", and 24" Injection Molded Meter Pits
