CAST IRON VS. CONCRETE

Heavy Duty Mark V and VII Series Valve Boxes are the standalone replacement for concrete valve access boxes. Concrete boxes frequently break during transit and must be replaced for reinstallation. Mark Series boxes can easily be reinstalled and the Mark V weigh 32 pounds – half the weight of most concrete boxes.

BUILT FOR DURABILITY

These boxes are made of 100% Cast Iron and meet a 20,000 lb proof load. No concrete apron is required. Along with easily installation, they have a long service life.

OPTIONS FOR EASY ACCESS

The Mark V has a round or triangle shaped lid with a 10" diameter. The Mark VII has a round 12" diameter lid. These large diameter boxes easily fit over 8" PVC. Lids are available with a 2½" skirt, heavy duty 4" skirt, or heavy duty locking bar & bolt.

RIM	FLANGE	INSIDE DIAMETER	HEIGHT	WEIGHT
MARK V ROUND	No Flange	10	11.5	32
MARK V ROUND	Flange	10	11.5	44
MARK V TRIANGLE	Flange	10	11.0	56
MARK VII ROUND	Flange	10.25	11.5	50

LID	DESCRIPTION	LID DIAMETER	WEIGHT
MARK V ROUND	2½" Skirt	9.8	15
MARK V ROUND	4" Skirt	9.8	21
